Accelerate, automate and manage your transformation journey

Together, DXC Technology and Oracle provide dynamic technology leadership to customers looking for increased agility, global scalability and deep business insights.

DXC and Oracle at a glance

- DXC provides comprehensive services for Oracle's complete portfolio, including its market-leading SaaS applications and highly scalable cloud platform.

- DXC is one of only two global Oracle Managed Service Providers.

- DXC helps customers redirect IT investment dollars to digital innovation and growth.

About Oracle

Oracle is a leading provider of business software, with a broad portfolio of solutions for companies of all sizes. More than 430,000 customers in 175 countries use Oracle technologies to seize business opportunities and solve complex challenges. Oracle offers integrated suites of applications plus secure, autonomous infrastructure in the Oracle Cloud. For more information about Oracle (NYSE: ORCL), please visit us at www.oracle.com.

Customer benefits

The DXC and Oracle partnership draws on an extensive community of business, technology and industry experts focused on bringing business value to enterprises. DXC and Oracle jointly develop and implement solutions that combine the market-leading strengths of Oracle's cloud portfolio with DXC's deep, unrivaled expertise in enterprise applications and platforms.

With DXC's experience across top application vendors, DXC provides seamless integration among Oracle's suite of SaaS applications, non-Oracle cloud applications, and legacy, on-premises applications on any hardware or cloud platform.

DXC and Oracle work together to design and implement solutions that take a pragmatic approach to solving real-world business problems. Using our repeatable, automated, proven services, our customers leverage DXC and Oracle solutions to transform their businesses by making the best use of leading-edge digital innovations.

DXC helps enterprises deploy Oracle solutions to increase productivity and efficiency while improving business and IT processes in support of strategic goals.

In doing so, DXC and Oracle customers have reduced costs and improved their return on investment for both existing and new solutions.

Joint offerings/solutions

Through our partnership, we bring the strengths of DXC and Oracle to customers in three key areas:

- **Next-generation applications for the as-a-service economy.** We help accelerate time to value by implementing and upgrading Oracle Cloud SaaS Applications, including Oracle Enterprise Resource Planning Cloud, Oracle Supply Chain Management (SCM) Cloud, Oracle Human Capital Management (HCM) Cloud and Oracle Transportation Management Cloud, which are aligned with DXC's migration, integration and management services. Customers can choose how they implement and run their application portfolios to best fit their needs. Our Oracle offering portfolio provides industry-specific accelerators backed by a track record of successful implementations, and offers the option of having DXC run, automate, maintain and test the customer's applications.

For more than four decades, Oracle has delivered innovation upon which entire industries have been built. We continue to deliver innovation to our customers, partners, and communities.

- **Moving and improving existing legacy applications on Oracle's Cloud Platform.** DXC supports customers as they transform their businesses and migrate applications to a hybrid cloud environment using cloud platforms with DXC's migration and management services. Our services provide a proven framework for leveraging Oracle's expansive Infrastructure as a Service (IaaS), Platform as a Service (PaaS) and Software as a Service (SaaS) solutions, in either traditional or as-a-service models.

- **Harnessing intelligent automation to streamline business operations.** DXC offers advanced robotic process automation (RPA) to analyze and update business operations to remove roadblocks and reduce delays, thus increasing business agility.

Differentiation

DXC and Oracle have worked together for more than 30 years. DXC is a platinum partner in the Oracle Partner Network with multiple Certified Excellence Implementer (CEI) achievements and is certified as one of only two global managed services providers (MSPs) in the Oracle partner community. DXC has an extensive number of complementary offerings, which allows us to tailor specific solutions to meet a wide range of customer needs. DXC has more than 4,500 Oracle consultants worldwide and qualifies for more than 45 Oracle specializations.

DXC and Oracle help customers stay at the forefront of technology developments. Oracle devotes billions of dollars each year to research and development, with DXC partnering to operate dedicated Oracle Solution Centers across the globe.
